- Import and edit existing images and animated GIFs
- Export to image, video, and animated GIF files
- Responsive to a stylus
- Keyboard shortcuts

Meet Pencil2D

Pencil2D is a free, open source application that allows you to create 2D drawings and animations just like the pros. A variety of drawing tools, like the Pen, Pencil, Brush, and Paint Bucket Tools, let you create your own unique art and bring it to life through animation and sound.

Available in 12 languages and compatible with most popular operating systems, Pencil2D can be used by anyone, from new artists to seasoned professionals. It's perfect for web designers, graphic designers, animators, and video editors. Because it's open source, Pencil2D can be customized and modified to fit your needs.

2D Drawing and Animation at Your Fingertips

Pencil2D makes creating traditional 2D drawings and animation easy with layers and onion skinning.

- The timeline and camera view allow you to design animated GIFs and videos that make your artistic vision a reality.
- Use a drawing tablet and stylus to take advantage of Pencil2D's pressure responsive technology and easily change the width or opacity of your drawing strokes.
- Use your mouse and keyboard to take advantage of Pencil2D's many simple keyboard shortcuts.

Create Images and Videos

With Pencil2D, you can export your drawings as a variety of image file types:

- Bitmap images
- Vector images
- Animated GIFs

Or add animation and sound and export a video as one of two file types:

- MP4 videos
- AVI videos

Simple Drawing Tools

The drawing tools in Pencil2D let you create unique designs in a variety of ways.

- Draw sketches with the Pen and Pencil Tools.
- Paint smooth strokes with the Brush Tool.
- Draw straight lines and curves with the Polyline Tool.
- Fill any area with color using the Paint Bucket Tool.
